8.2 Exposure controls

Individual protection measures, such as personal protective equipment

General protective and hygienic
measures:

The usual precautionary measures should be adhered to in
handling chemicals.

Titanium dioxide pigments are not irritants but as with all fine
powders can absorb moisture and natural oil from the surface of
the skin during prolonged exposure. Prolonged exposure should be
avoided by wearing suitable protective gloves and clothing.
Store protective clothing separately.

Breathing equipment:

If workplace exposure limits are exceeded, use respiratory
protection according to national regulations.

Hand protection

Requirements according to EN 374

Check protective gloves prior to each use for their proper condition.
Preventive skin protection by use of skin-protecting agents is
recommended.

Material of gloves:

The selection of suitable gloves does not only depend on the
material, but also on further marks of quality and varies from
manufacturer to manufacturer. If the product is used in a
preparation of several substances, the resistance of the glove
material cannot be calculated in advance and has therefore to be
checked prior to the application.

Eyeface protection

Safety glasses

Body protection:

Protective work clothing.
