**Individual protection measures, such as personal protective equipment**
**General protective and hygienic measures:**

The usual precautionary measures should be adhered to in handling chemicals.

Titanium dioxide pigments are not irritants but as with all fine powders can absorb moisture and natural oil from the surface of the skin during prolonged exposure. Prolonged exposure should be avoided by wearing suitable protective gloves and clothing. Store protective clothing separately.

**Breathing equipment:**

If workplace exposure limits are exceeded, use respiratory protection according to national regulations.

**Hand protection**

Requirements according to EN 374

Check protective gloves prior to each use for their proper condition. Preventive skin protection by use of skin-protecting agents is recommended.

**Material of gloves:**

The selection of suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. If the product is used in a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application.
